Fireplace Accessories

Handcrafted by artisan blacksmiths in Montana, Ironhaus fireplace tools and accessories are a beautiful addition to any hearth. Forged from steel and individually handmade, each piece is built with precision and pride.

Ironhaus Freestanding Screens are extremely durable, and built to last. Each screen is built from heavy duty carbon steel, with added features, such as replaceable screens insure that your fireplace accessory will last forever. Choose from a myriad of designs and options, with incredibly beautiful finishes and forged handles. We guarantee that you will be 100% satisfied with your custom freestanding screen.

Ironhaus artisans handcraft each forged toolsets, in styles from contemporary to traditional rustic, and all built to last a lifetime. Need a special poker, or a different design? Give us a call: we build everything custom and we will be glad to help you. Our customers love the attention to detail, and the organic finishes we use, especially when matching to their Ironhaus fireplace screens. Every piece is custom made, so the special designs and sizes you want are no problem. You will love your Ironhaus Fireplace Tool set.

Mantels have long been an issue with the limitations placed on them being too close to the fireplace and causing heat issues. Ironhaus non-combustible iron mantels makes it possible to lower your mantel giving more space and better protection for large screen TVs and other items often times placed above the fireplace. Since we custom build each mantel to order, your design possibilities are endless. Ironhaus also has a very smart installation system that allows the mantel to be placed before rock or other veneers are installed. The handcrafted quality and detail of these mantels is truly impressive, and they are designed to complement our other fireplace accessories perfectly.

Noncombustible Mantels

Traditional fireplace mantels pose many problems for today's custom fireplace applications, especially when space is limited above the fireplace for big screen TVs and art work. Ironhaus handcrafts non-combustible iron fireplace mantels in any custom size and design to address this common issue. Forged entirely from ¼” steel and designed to match any of the Ironhaus fireplace screens and doors, they also have these benefits:

- Capable of being installed directly above fireplace
- Custom made to order
- Simple and Smart engineered install system
- Designs Match Ironhaus Fireplace Screens & Doors
- Modern, Traditional, Contemporary or Rustic Styles
- Can be Used for a Base Support For Other Mantel Materials ie Granite, Timber, Wood or Stone

Finish Options

When choosing your final finish selections refer to your dealers sample board. All finishes are handcrafted resulting in variations from one piece to another, as in all great artwork.
