More than just a pretty face.

A blacksmith shop at heart, Ironhaus doors and faces are handcrafted meticulously by artisans in Montana.

Luxury, quality fireplace doors for masonry, gas and wood fireplaces are hand forged from 1/4" thick bar steel.

Ironhaus doors are more than just pretty faces. Glass doors provide better control and much more efficiency than an open fireplace. Mesh doors on gas fireplaces offer protection from high temperature glass.

Visit www.ironhaus.com to find an authorized Ironhaus Dealer in your area.

Upgrades For Gas Fireplace Doors

DV Masons Form

The Ironhaus DV mason form benefits the contractor, mason and home owner in several ways. The form provides a predictable template for the mason while guaranteeing a final straight edge for a door to cover later. It also allows the doors to be placed farther away from the gas fireplaces’ hot surface. Since custom doors can take 4-6 weeks to build, and a mason form takes generally less than a week, work flows can be continued without delays. Doors can be installed easily later, after the mess and risk of damage from construction is over.
